Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-34 are pending.

Election/Restriction

2. Applicant's election of Group I with traverse is acknowledged. No reasons were given for the traverse.

Abstract

3. The abstract is defective because there are no chemical structures that correspond to the formula (1) or compounds (2 and 3). It is recommended that applicants draw the chemical structures.

Information Disclosure Statement

4. The information disclosure statement filed on Sept. 12, 2001 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. Two references (Tetrahedron Vol. 44, No 12, pp 3727-3274, 1998 and EP 0769495) are missing. Applicants are kindly requested to provide said references.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Clough et al. (US. Pat. No. 5,021,581). The cited reference teaches the synthesis of Formula (II) (column 23, $R^5 = H$) that is obtained by treating phenylacetate derivative represented by Formula (III) with methyl formate in the presence of a base (see scheme 1 and column 21 last paragraph). Said Formula (II) is the same as applicants when applicant's formula (II) has the following substituents:

R_1 = optionally substituted aryl, $X = O$, and R_2 = methoxy.

Claim Rejections - 35 USC § 112

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention:

- a. Claim 1 and claims dependent thereon are rejected because in claim 1 (line 11), the term alkyl is written as "alykl".
- b. In claim 1 (line 17), the term "optiobally" should read as "optionally".
- c. In claim 1 (last line), substituted is misspelled as "substitued".
- d. In claim 1 or elsewhere in the claim, the phrase "optionally substituted" is indefinite. What are covered and what are not? Applicants have to recite the substituents assuming that there is enough support in the specification. For example, optionally substituted by C1-C20 alkyl is acceptable.
- e. In claim 1, the phrase "heterocyclic group" is indefinite. What is the size of the ring? What is the number and nature of the heteroatoms? Can the ring be fused or spiroconnected to another ring, and if so, what kind of ring? Can the ring be bridged? Unsaturated? Cf *In re Wiggins*, 179 USPQ 421, 423.
- f. In claim 1 or elsewhere in the claims, the phrase "general formula" is indefinite. A formula cannot be a general one. It is recommended that applicants delete "general" from said phrase.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kahsay Habte, Ph. D. whose telephone number is (703) 308-4717. The examiner can normally be reached on M-F (9.00AM- 5:30PM).
